Project Agreement

Website Upgrade (Version 2.0)

This is a simple agreement between us to make sure we're on the same page for the new website.

1. What's Included

I'll be building the new "Version 2" (V2) of your website as outlined in the project proposal. Here's exactly what you're getting:

1.1 Better Booking System

✓ A new booking form where customers can add up to 4 different stops in one trip.

✓ Automatic wait time pricing (set at Rs. 100-200 per hour depending on the area).

✓ A "Find My Location" button so customers don't have to type their address.

✓ Easy-to-use buttons to pick the number of adults, kids, and bags.

1.2 Tours & Trips

✓ A clean, organized tours section divided into Day Tours, City Tours, and Safaris.

✓ All tours will now include a driver for a full service experience.

✓ A calendar so customers can pick their travel dates and get a price right away.

1.3 Support & Communication

✓ A support chat system so you can message your customers directly.

✓ Automated emails for new bookings and welcome messages.

✓ An admin tool for you to send emails to all your customers at once.

1.4 Extra Tools

✓ A blog area where you can write about travel to help your site show up on Google.

✓ Your TripAdvisor and Google reviews shown right on the home page.

✓ A tool for you to create your own discount coupon codes.

2. Pricing

Total Project Fee

Rs. 45,000.00

Important Note on Bank Fees: This is my fixed fee for building the site. If you use a payment gateway (like Sampath Bank or Stripe), they will take their own small fee from each transaction. That's separate from this 45,000 fee.

3. Timeline & Delivery

I'll start working as soon as you give the okay. I'll work in stages and keep you updated as I finish each part, ensuring everything is perfect before we go live.

4. Ownership

Once the work is done and paid for, the new website and all its code belong entirely to you. You have full control over your digital business.
